

“An organization’s physical assets define its capabilities. We are your Government Solution for Asset Management”

Our mission is to provide the most complete technical, physical and financial information about your assets so that your team can make the best decisions possible. That’s the value of technology intelligence.

As government officials, you need to be proactive. You need to know your assets, their value and how to optimize them. Then, with the proper tools and knowledge, you can build an open, responsive ecosystem to service your municipality. Micor can build the tools and practices your organization needs to stimulate your work flows and build a collaborative culture.

Who We Are

For over 25 years Micor has been providing appraisal, consulting, fixed asset management, and reporting services to organizations big and small, domestic and international. Micor is a business operating out of the Greater Chicagoland.

Our firm has built a reputation for quality and reliability for asset management and appraisal. Micor’s team actively maintains technical and industry knowledge of computing, media, and mechanical engineering issues that affect value and useful life of business and municipal assets.

Micor’s client base includes large financial and business entities such as Bank of America, Chase, Capital One, Sony, Panasonic, Panavision, and many others. Projects have ranged from small assessments of written inventories to large volume, asset discovery and reconciliation projects covering multiple sites.

How You Benefit

At the heart of Micor Analytics asset management service is the promise of money and time saved.

- Eliminate duplicate and unnecessary purchasing and discover lost or missing assets
- Save money and time with reliable value data for compliance and planning
- Take advantage of under utilized assets and improve the performance of existing assets
